

GW - 75 Filling System

Gravimetric filling system GW 75 is an ideal device for dispensing preset quantity of granular products like seeds, pulses etc. into bags. The device can be easily integrated to traditional low height hopper/silo mouths. It can be used for dispensing quantity from 10 - 50kgs. The device comes with an integrated clamping mechanism.

GW 10 Filling System

Gravimetric filling system GW 10 is an ideal machine for automatically dispensing preset quantity of free flowing products like seeds and pulses etc.. This is a load cell based pneumatically operated machine. It has a storage hopper and is equipped with coarse feed and fine feed system to maintain the filling accuracy. The output could be collected in a bag directly which can be sealed on a sealing machine. Gravity feed models are available for quantity from 200-1000gms and Vibratory feeder models are offered for 500-5000gms.

Filling System

Filling System suitable for open mouth bags in the range: 1Kg–10Kg/ 1Kg–20Kg/ 5Kg–50Kg, up to 10 bags per minute. Dual load cells for greater accuracy | Coarse & fine feed weighing arrangement | Digital indicator with high visibility display | Simple software operation and set-up | Digital Weight Indicator | Bag counter | Auto zero

Filling system can be offered with suitable accessories for filling.

Pneumatic Sealing Machine

SEPACK PS 900 pneumatic sealing machine is suitable for sealing various plastic film bags and Aluminum plastic laminated bags with maximum sealing length of 900mm (standard) and maximum loading of 80kg. The sealing operation can be controlled using foot switch.

Continuous Sealing Machines

To seal different types of pre filled flexible bags continuously. Applications in various industries like food processing, chemicals engineering etc. Smaller are suitable for packets upto 1Kg. and bigger models are suitable for bags upto 30Kg.

Carton Sealing Machine

This machine is used for top and bottom sealing of carton (secondary) boxes using BOPP tapes.

Accessories for filling

Offering a continuous moving surface which can carry bags, cartons, raw material etc., In a typical production environment

Non-Scooping Type

Ideal for filling raw products into silos, hoppers for further processing. Both scooping and non-scooping types are available

Scooping Type

Sepack India Pvt. Ltd, Unit II, XII/293, Kizhakkambalam, 683 562, Kerala, India, Tel: +91 - 484 - 2682780 (3Lines) 3218736, Fax: +91 - 484 - 2681911, E-mail: mktg@sps.sevana.com | www.sepack.in | www.sevana.com
