

Gravimetric Weigh Dispenser for free flowing products

GW- 10 small fillers Gravity feed

GW – 10 – small fillers are suitable for dispensing free flowing granular products by weight into pouches /containers etc. The gravity feed models are most suitable for free flowing small size granular products, vibratory feeder type is normally preferred for granular products which are non – free flow characteristics and bigger in granular sizes.

GW – 10 – Gravity feeder models are offered in the range of 100 gms ~ 1000 gms, speeds vary from 6 –9 dumps /min depending on weight and product features.

*Pneumatically operated
